

SKYR@CER PCI 2101gmr

Wireless PCI Card

MaxiRange: MIMO technology

Wireless Chipset: Ralink

Get the most of MIMO technologies and build a performing network that reaches up to 6 times further than standard g. Specially indicated for environments with difficulties for radio communication, like thick wall buildings, several floors areas, or long distances. Improved real throughput thanks to packet OVERDRIVE™ technology from Ralink.

This high speed **wireless PCI CARD** enables you to connect your notebook to a wireless network. It is fully backwards compatible with all IEEE.802.11b and IEEE.802.11g standards.

Features:

- Wireless PCI Card
- Standard: IEEE.802.11g
- Speed: MIMO
- Wireless range: 6x better than 11g
- Interface: PCI
- WEP (64 / 128 bit)
- WPA
- WPA-PSK
- 802.1X
- Ad-Hoc Mode
- Antenna Type: external
- Antenna Connector: Reverse SMA

Available drivers/software

- Windows 2000
- Windows XP
